- LIQUID FILLED STAINLESS STEEL PRESSURE GAUGES
- LOCAL / OFF / REMOTE OPERATION MODES
- WARRANTY: 2 YEAR

Duplex Dental Oral Evacuation System

30 USER / 20 HORSEPOWER DUPLEX

I-vac Services Inc.

The **Evacuorr Series Vacuum Systems** are designed to facilitate institutions with up to 300 dental chairs.

For applications requiring 10" Hg or less, we utilize Regenerative Blower pumps.

For applications requiring a minimum of 14" Hg, we utilize Rotary Claw pump technology.

Each system is tailored for a specific application.

I-vac Services Inc. provides a balance of performance and value to meet the customers' needs.

UNMATCHED EXPERIENCE

I-vac Services Inc. has designed and fabricated some of the nation's largest dental college compressed air & vacuum systems as large as 230 users.

We routinely design custom NFPA Level I & II Systems for medical applications, which must be certified to perform as specified.

I-vac Services Inc. provides products that meet or exceed NFPA specifications!

CENTER: CUSTOMIZED AMALGAM SEPARATION SYSTEM

MADE IN THE U.S.A

Over 80% of our components are American Made.

I-vac Services Inc. has over 35 years of experience in the dental industry. Our designs are simple yet efficient. We use only the highest quality components from some of the world's leading component manufacturers.

We provide our customers with a basic system quotation and then give them numerous options with an explanation of the options and the benefits of each option. We don't use the "One Size Fits All" approach.

I-vac Services Inc. has the capability to customize the structure of each system to fit within the space required. Each machine is fully tested with before leaving our facility with calibrated and certified test instruments to ensure performance as advertised.
